

Sven the Cactus presents...

Word Adventures

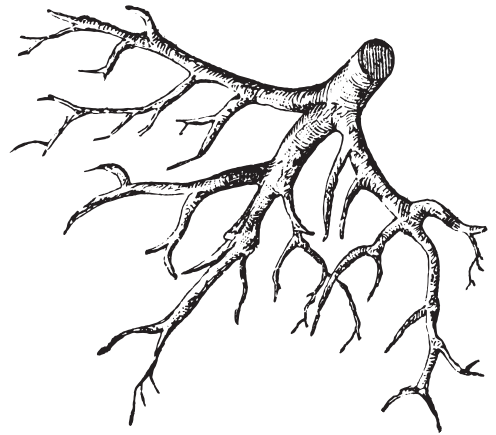

The word of the week is:

a part of the plant that is usually hidden underground. Roots have many different purposes but the most important points is they keep the plant secure and upright.

They help collect food and water from the soil to keep the plant alive.

The roots grow through the entire life of the plant. The root tips are the toughest parts of the plant, their job is push through the soil to find food and water to protect the plant.

Word Adventures: Roots

Activity of the week: Patterns

Create a pattern using the letter(s) displayed in each box. All patterns must be different.
