

Sven the Cactus presents...

Word Adventures

The word of the week is:

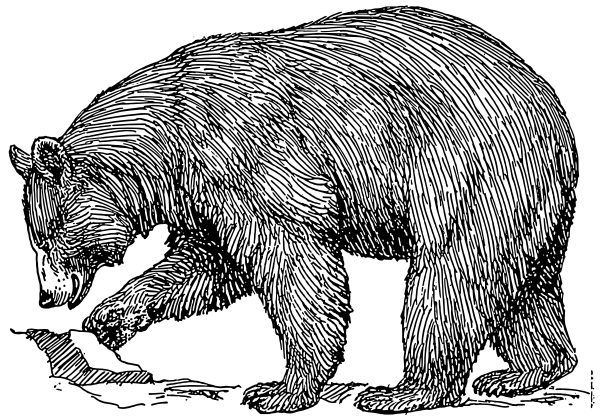

Bears are carnivorous mammals of the family Ursidae. There are eight species of bears and they can live up to 25 years in the wild.

Bears can be as small as four feet long, to as big as eight feet long.

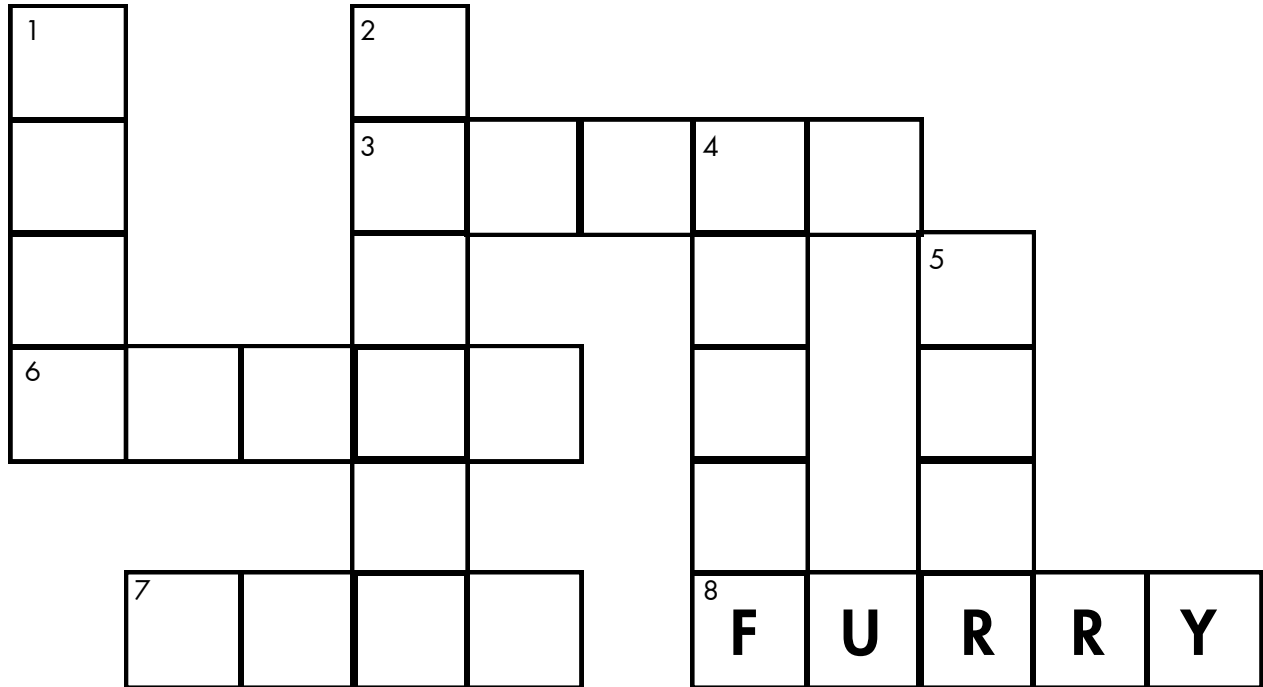

Bears can be found throughout North America, South America, Europe, and Asia.

They have a powerful physical presence, and they are adept runners, climbers, and swimmers.
