

Sven the Cactus presents...

Word Adventures

The word of the week is:

Also known as Cryptanthus species, these plants come in a variety of different shapes, colours, patterns, and sizes. This tropical plant is native to Brazil and has a three-year life cycle from pup to flowering plant.

Earth stars have stiff and slightly coarse leaves arranged in a rosette shape. Due to its unique shape, this species is known as the earth star, starfish plant, and red star bromeliad.

This plant has more than 1,200 different species of earth stars with a diverse variety of foliage.

Word Adventures: Earth Star

Activity of the week: Colour By Number
